FELIPE ANTONIO FUMERO MORA

felipefumerom@gmail.com | +506 8413-4000 | **Cedula**: 1-18760797
Portfolio: felipefumero.com | **GitHub**: github.com/ffumero2003

PROFILE

Specializing in modern web and mobile applications using React, React Native, and TypeScript. Focused on clean code, UX engineering, and AI-assisted development (Claude, Cursor, ChatGPT, Copilot). Experienced building authentication systems, responsive interfaces, and scalable architectures. Interest in expanding toward full-stack development to create comprehensive solutions.

EDUCATION

Cenfotec University - San Jose, Costa Rica   **Software Development Technician** | October 2022 - July 2024

Technical certification in full-stack development. Coursework: React, TypeScript, JavaScript, Node.js, databases, software architecture, and modern web development practices.

LEAD University - San Jose, Costa Rica   **Bachelor of Business Administration** | October 2022 - June 2026(Expected)

Relevant Coursework: Digital Marketing & E-commerce, Business Strategy, Operations & Services, Investment Analysis

TECHNICAL SKILLS

Core Technologies: React, React Native (Expo), TypeScript, JavaScript, HTML5, CSS3, Node.js, REST APIs
Frameworks & Libraries: Tailwind CSS, Bootstrap, Zustand, Context API, React Router, Framer Motion, GSAP.
Development Tools: Git/GitHub, Postman, Figma, Vite, Supabase, Firebase, Vercel, Netlify, Expo
AI-Assisted Development: Claude, Cursor, GitHub Copilot, ChatGPT (for coding optimization, debugging, and workflow acceleration)
Database & Backend: Have been around PostgreSQL, Express.js, JSON Server, AsyncStorage

PROFESSIONAL EXPERIENCE

Social Brands - Costa Rica (E-commerce brand - Northweek sunglasses retailer)
Front-End Developer | October 2024 - January 2025
- Built complete e-commerce website from scratch using Shopify Liquid, HTML/CSS, and JavaScript
- Implemented strategic upselling features, promotional displays, and optimized navigation to enhance customer journey and increase sales potential
- Redesigned visual interface and improved overall page aesthetics, creating cohesive brand experience
- Delivered production-ready solution independently, managing all development phases

PayFacility - Costa Rica (Payment processing solutions - POS systems for Central and South America)
Software Developer Intern | October 2025 - February 2026
- Worked with DS Spread application in sandbox environment to learn payment transaction workflows.
- Conducted extensive transaction testing and debugging using ADB/Logcat to understand authorization, reversal, and error handling processes
- Gained practical knowledge of payment industry protocols: EMV chip processing, TLV data structures, and ISO 8583 messaging standards
- Expanded technical skills by learning Code in Time, a no-code development platform for rapid application prototyping

Freelance Developer | October 2025 - February 2026
- Contracted for 25-hour project working with Code in Time, becoming first external freelancer hired by the company
- Delivered specific development tasks using no-code platform to accelerate internal tooling and workflows
- Demonstrated ability to quickly adapt to new technologies

Mentorship Experience
David Luna – Senior Developer at Novacomp / Professor at Cenfotec
June 2025 - November 2025
- Received technical mentorship in React architecture, component design patterns, advanced hooks, and state management strategies
- Learned industry best practices for front-end architecture, responsive design systems, and API consumption patterns

KEY PROJECTS

PuffZero – Full-Stack Mobile App (In Development)
React Native, Expo, Supabase, TypeScript, Google Auth
- Building a habit-tracking mobile app with a complete authentication system (register, login, email verification, password reset).
- Integrated Supabase backend for real-time data synchronization and Google Sign-In for user authentication
- Designed guarded navigation system ensuring proper user flow based on authentication and onboarding status
- Implemented multi-currency logic and persistent state management across the app
  Live: https://puffzero-landing.vercel.app/

Job – Job Application Tracker (Micro SaaS)
React, Tailwind, Context + Reducer, LocalStorage
- Created kanban-style job application CRM.
- Built scalable front-end architecture with visual analytics dashboard, prepared for future backend integration
- Implemented full CRUD operations with optimistic UI updates and persistent state via localStorage
- Designed pipeline visualization helping users track application progress across multiple stages
  Live: https://job-flow-navy.vercel.app/

Auth Flow App – Full-Stack Authentication System
React, Node.js, Express, PostgreSQL, Tailwind
- Built secure authentication system handling test users with bcrypt password hashing and Zod validation
- Developed RESTful API using Express and PostgreSQL, deployed on Vercel (frontend) and Render (backend)
- Achieved seamless user experience with proper error handling and loading states across all authentication flows
  Live: https://auth-flow-kappa.vercel.app/login

ADDITIONAL TRAINING

Recent Certifications (2025 - 2026):
- React Native v3 (Frontend Masters – Kadi Kraman)
- React Native Mobile Course (Buildcamp.io – Gregory John)
- Learn Shopify Liquid Programming (Udemy – Bernard Polidario)

Previous Certifications (2023 - 2024):
- Complete Full-Stack Web Development Bootcamp(Front-End focused).
- Introduction + Intermediate Python (DataCamp)

LANGUAGES
- **Spanish** (Native)
- **English** (C1 - Advanced - Professional working proficiency
