Portfolio: felipefumero.com | GitHub: github.com/ffumero2003 | LinkedIn

PROFILE

Data Engineer who builds data pipelines and AI-powered data products that turn raw data into decisions. Ships end to end, from ingestion and modeling to natural-language query and explanation layers, on a strong Python and SQL foundation. Deep AI/LLM integration experience (18 Anthropic certifications) and a full-stack background that has shipped real products to production. C1 English.

PROFESSIONAL EXPERIENCE

Junior Data Engineer — CriticalRiver Mar 2026 – May 2026

US AI & data services consulting firm — Costa Rica

- Completed the CriticalRiver Data & AI Freshers Program: structured DE training across Airflow, dbt, BigQuery, Snowflake, Power BI, Tableau, and SQL.
- Built end-to-end GCP practices: GCS setup, BigQuery loading with partitioning/clustering, SQL cost optimization, and Looker Studio dashboards; configured an Airflow pipeline in Docker/PostgreSQL. Scored 80% on the formal WeCP Data Engineering assessment.

Software Developer Intern — PayFacility Oct 2025 – Jan 2026

Fintech (payment processing & POS for LATAM): tested and debugged payment transaction workflows (authorization, reversal, error handling) using ADB/Logcat.

Front-End Developer — Social Brands Oct 2024 – Sep 2025

Built and independently shipped a production e-commerce site (Northweek/Hawkers eyewear) from scratch with Shopify Liquid, HTML/CSS, and JavaScript, including upselling and navigation optimizations.

KEY PROJECTS

GitHub Firehose — Real-Time Dev Activity Pipeline at Scale

PySpark, BigQuery, dbt, Apache Airflow, SQL

- Built an end-to-end PySpark pipeline ingesting 100M+ nested JSON events from the GitHub Archive firehose, using an explicit schema for contract safety and filter-early predicate pushdown.
- Wrote a BigQuery star schema (2 facts + 4 dimensions) via the Storage Write API, modeled 5 dbt marts with 11 data-quality tests reconciling against the Spark layer, and orchestrated idempotent daily ingestion as an Airflow DAG.

Credit Risk Scoring + Explainable AI — End-to-End Credit Pipeline

Python, BigQuery, dbt, XGBoost, SHAP, Claude API, Airflow, Docker

- Built a credit-risk scoring pipeline over ~308K loan applications and ~1.7M bureau records, scoring per-applicant default risk with an XGBoost model (vs. logistic-regression baseline; AUC/Gini/KS metrics).
- Used SHAP for per-applicant reason codes, then a Claude-powered layer turning them into FCRA-style adverse-action notices (excluding protected attributes for ECOA alignment), orchestrated as an Airflow DAG in Docker.

LATAM Economic Intelligence Dashboard — Pipeline with AI Query Layer

Python, pandas, BigQuery, dbt, Looker Studio, Claude API

- Built an end-to-end pipeline ingesting live U.S. Federal Reserve (FRED) indicators into BigQuery (retry/backoff) and modeled them with dbt; added a Claude NL-to-SQL layer converting plain-English questions into read-only SQL with explained results.

PuffZero — Full-Stack Mobile App (Live on Android | iOS in Review)

React Native, Expo, Supabase, TypeScript, AI Integration

- Built a full-stack cessation app (108+ source files, MVVM) with complete Supabase auth, an OpenAI-powered chat assistant synced to live user state, progress tracking with charts, and RevenueCat/Stripe paywall.

TECHNICAL SKILLS

Data Engineering: SQL, Python, PySpark, pandas, BigQuery, Airflow, dbt, Power BI, Tableau, Looker Studio

AI/LLM: Claude API, Claude Code, Model Context Protocol (MCP), AI Agents, Prompt Engineering, OpenAI API

Backend & Cloud: Flask, Django/DRF, PostgreSQL, Redis, Node.js, REST APIs, GCP, Docker, Git

Frontend: React, React Native, TypeScript, JavaScript, HTML5, CSS3, Tailwind

CERTIFICATIONS & EDUCATION

18 Official Anthropic Certifications (Skilljar, 2026): Claude API & Claude Code, Model Context Protocol, AI Agents/Subagents/Skills, Bedrock & Vertex AI deployment, AI Fluency.

Software Development Technician — Cenfotec University Oct 2022 – Jul 2024

B.B.A. Business Administration — LEAD University Oct 2022 – Aug 2026

Languages: Spanish (Native), English (C1 — Advanced, Professional Working Proficiency)
