

FELIPE ANTONIO FUMERO MORA

felifumerom@gmail.com | +506 8413-4000

Portfolio: felifumerom.com | GitHub: github.com/ffumero2003

PROFILE

Data Engineer focused on building data pipelines and AI-powered data products that turn raw data into decisions. Ships end to end, from ingestion and modeling to natural-language query and explanation layers, on a strong Python and SQL foundation, with deep AI/LLM integration experience (18 Anthropic certifications) and a full-stack background that has put real products into production. C1 English.

PROFESSIONAL EXPERIENCE

CriticalRiver — Costa Rica (US-headquartered AI and data services consulting firm)

Data Engineer | March 2026 – May 2026

- Selected for CriticalRiver Data & AI Freshers Program — a structured Data Engineering training initiative covering Apache Airflow, dbt, BigQuery, Snowflake, Power BI, Tableau, and SQL fundamentals
- Built guided GCP practices end-to-end using Superstore Sales dataset: GCS setup, BigQuery loading with partitioning and clustering, SQL cost/performance optimization, Looker Studio dashboard
- Configured Apache Airflow weather data pipeline in WSL 2 (Ubuntu) using Docker, PostgreSQL, and Weatherstack API
- Contributed to internal full-stack testing-framework repository (Python/Flask + React/Vite, Docker Compose, Azure DevOps), debugging API endpoints and SQL client logic
- Completed formal Data Engineering assessment on WeCP platform scoring 80%, evaluating Apache Airflow, dbt, SQL, Tableau, Power BI, Python Data Science, and Agile/PM fundamentals

PayFacility - Costa Rica (Growing fintech innovator delivering payment processing and POS solutions for the Central and South American market.)

Software Developer Intern | October 2025 - January 2026

- Worked with DS Spread application in sandbox environment to learn payment transaction workflows.
- Conducted extensive transaction testing and debugging using ADB/Logcat to understand authorization, reversal, and error handling processes

Social Brands - Costa Rica (Exclusive authorized retailer of Northweek and Hawkers sunglasses in Central America.)

Front-End Developer | October 2024 - September 2025

- Built e-commerce website from scratch using Shopify Liquid, HTML/CSS, and JavaScript
- Implemented strategic upselling features, promotional displays, and optimized navigation to enhance customer journey and increase sales potential
- Delivered production-ready solution independently, managing all development phases

KEY PROJECTS

Credit Risk Scoring + Explainable AI – End-to-End Credit Pipeline with FCRA(Fair Credit Reporting Act)-Style AI Explanations Python, BigQuery, dbt, XGBoost, SHAP, Claude API, Apache Airflow, Docker, React, Flask, Looker Studio

- Built an end-to-end credit-risk scoring pipeline over ~308K loan applications and ~1.7M bureau records, producing per-applicant default-risk scores with plain-English reasons.
- Trained an XGBoost risk model against a logistic-regression baseline, evaluated with industry metrics (AUC, Gini, KS), and used SHAP to generate per-applicant reason codes.
- Built a Claude-powered layer turning those codes into FCRA-style adverse-action notices, excluding protected attributes for ECOA fair-lending alignment.
- Orchestrated the full ingest, transform, score, and quality-check flow as an Airflow DAG in Docker.

Code: github.com/ffumero2003/credit-risk-explainable-ai

LATAM Economic Intelligence Dashboard – End-to-End Data Pipeline with AI Query Layer Python, pandas, BigQuery, dbt, Looker Studio, Claude API, React, Flask

- Built an end-to-end pipeline ingesting live U.S. Federal Reserve (FRED) indicators into BigQuery, with retry/backoff handling for API limits.
- Modeled raw data into analytical tables (yearly averages, year-over-year change) with dbt.
- Developed a natural-language query layer (Claude API) that converts plain-English questions into SQL, runs them against BigQuery with read-only guardrails, and returns explained results.

Code: github.com/ffumero2003/latam-economic-intelligence-dashboard

PuffZero – Full-Stack Mobile App (Live on Android | iOS — In Review)

React Native, Expo, Supabase, TypeScript, Google Auth, AI Integration

- Built a vaping cessation mobile app (iOS/Android) with 108+ source files following MVVM architecture with dedicated ViewModels, guards, services, and providers
- Implemented complete authentication system with email/password, Google Sign-In, email verification, password reset, and account deletion — all backed by Supabase
- Integrated OpenAI-powered AI chat assistant "Zuffy" providing personalized insights, motivational quotes, and habit guidance
- Built notification system, progress tracking with chart visualizations, and paywall integration via RevenueCat/Stripe

And more projects in my portfolio website: felipefumero.com

TECHNICAL SKILLS

Data Engineering: SQL, Python, pandas, BigQuery, Power BI, Tableau, Airflow, dbt, Snowflake

Backend & Databases: PostgreSQL, Node.js, Express.js, REST APIs

Frontend: React, React Native, TypeScript, JavaScript, HTML5, CSS3, Tailwind

Tools: Git/GitHub, Docker, WSL 2, Azure DevOps, Postman, Looker Studio, Vite, Vercel, Figma

AI/LLM Integration: Claude API, Claude Code, Model Context Protocol (MCP), AI Agents, Prompt Engineering

AI-Assisted Development: Claude, Cursor, Gemini, ChatGPT

ADDITIONAL TRAINING

AI & Claude Development (Anthropic, 2026):

- Completed 18 official Anthropic certifications via Skilljar, covering:
 - Claude API development and Claude Code (agentic CLI coding tool)
 - Model Context Protocol — Introduction + Advanced Topics (building MCP servers and integrations)
 - AI Agents, Subagents, and Agent Skills architecture
 - Claude deployment on AWS Bedrock and Google Cloud Vertex AI
 - AI Fluency Framework (foundations, capabilities & limitations)

Credentials: <https://www.linkedin.com/in/felipe-fumero-b5186030b/>

Data & Engineering Foundations:

- Python: Introduction + Intermediate (DataCamp, 2023)
- Complete Full-Stack Web Development Bootcamp – front-end focused (2024)

Frontend & Mobile (2025–2026):

- React Native v3 (Frontend Masters – Kadi Kraman)
- React Native Mobile Course (Buildcamp.io – Gregory John)
- Learn Shopify Liquid Programming (Udemy – Bernard Polidario)

Mentorship:

David Luna — Senior Developer at Novacomp / Professor at Cenfotec (June – November 2025).

- Technical mentorship in React architecture, component design patterns, advanced hooks, and state management strategies.

EDUCATION

Cenfotec University - San Jose, Costa Rica

Software Development Technician | October 2022 - July 2024

Technical certification in full-stack development. Coursework: React, TypeScript, JavaScript, Node.js, databases, software architecture, and modern web development practices.

LEAD University - San Jose, Costa Rica

Bachelor of Business Administration | October 2022 - August 2026

Relevant Coursework: Digital Marketing & E-commerce, Business Strategy, Operations & Services, Investment Analysis

LANGUAGES

- **Spanish** (Native)
- **English** (C1 - Advanced - Professional working proficiency)
